

# 2026 KLEEFSTRA SYNDROME SCIENTIFIC SUMMIT

FRIDAY, AUGUST 7, 2026 | BOSTON, MA

| Session Title                                                                                            | Speaker           | Time           | Room   |
|----------------------------------------------------------------------------------------------------------|-------------------|----------------|--------|
| Updates on Kleefstra Initiatives in the Netherlands                                                      | Tjitske Kleefstra | 9:00-9:30 AM   | EDEN A |
| EHMT2 Loss-of-Function Alterations Cause a Kleefstra-Like Syndrome                                       | Maria J Barrero   | 9:30-10:00 AM  | EDEN A |
| Buzzing into the Night: Drosophila as a Model for Sleep Disturbances in Kleefstra Syndrome               | Mireia Coll-Tané  | 10:00-10:30 AM | EDEN A |
| <b>B R E A K</b>                                                                                         |                   | 10:30-10:45 AM |        |
| Updates on Research Initiatives on NDDs at COMBINEDBrain                                                 | Terry Jo Bichell  | 10:45-11:15 AM | EDEN A |
| Plasma Proteomics in Rare Genetic Disorders Identifies Shared Inflammatory and Neurodegenerative Targets | Anna Pfalzer      | 11:15-11:45 AM | EDEN A |
| Using DNA Methylation Signatures to Improve Rare Disease Diagnosis: Building Shared Data Resources       | Danny Miller      | 11:45-12:15 PM | EDEN A |
| <b>L U N C H</b>                                                                                         |                   | 12:15-1:15 PM  |        |
| <b>SWITCH OVER TO SCIENCE FOR FAMILIES AT MAIN CONFERENCE!</b>                                           |                   | 1:15 PM        |        |
